PETER BK

Flutter & Python Developer | Cross-platform apps for mobile, web, desktop and wearables

Itahari, Nepal | +977-9862429737, +977-9803474640 | peterbk1998@gmail.com | LinkedIn | GitHub

Profile

Flutter and Python developer with 5+ years of experience building and shipping production applications across Google Play, the App Store, and the Microsoft Store. Currently working on EGW Writings, a cross-platform reading and listening application for mobile, tablets, web, desktop, and wearables. Experienced in Clean Architecture, BLoC, Provider, offline-first applications, and FastAPI backend development. Skilled in building scalable, maintainable applications and integrating modern AI-assisted development tools to improve development and debugging workflows.

Experience

Software Engineer, WebPoint Solutions Pvt. Ltd.

March 2022 to Present. Joined as Associate Software Engineer, promoted to Software Engineer in June 2024.

- Lead Flutter development on multiple cross-platform apps across mobile, web and desktop.
- Design modular app architectures with BLoC and Provider that stay easy to extend and test.
- Cut app load time and keep the UI smooth by profiling and optimizing builds.
- Integrate REST APIs, offline caching and localization so apps work offline and in several languages.
- Mentor junior developers, review code and contribute to deployment pipelines.

Associate Software Engineer (Part-Time), Remote Coach Solutions

June 2023 to February 2024

- Built and maintained white-label fitness apps in Flutter, producing multiple branded apps from one codebase.
- Set up environment-based configuration and app flavors for each brand.
- Integrated analytics, push notifications and payment gateways.

Junior Flutter Developer, Nandi Technology

April 2021 to March 2022

- Developed mobile app UI with Flutter and Firebase.
- Published apps to Google Play and the App Store.
- Implemented REST API integrations and improved app performance.

Selected Projects

EGW Writings (mobile, tablet, web, desktop, wearables). A large book reading and listening app with offline reading, backend sync, history tracking and an adaptive UI. Includes audio player state management.
Noah Ark Solutions Backend (Python). A multi-tenant SaaS backend for church management apps, built with FastAPI and MongoDB. One backend serves many church apps, each with its own configuration.
Youth Summit Desktop and Field Apps. A desktop app for book distribution that syncs offline data when a connection returns, and a field app with live student and leader locations on Google Maps, SOS alerts, chat and distribution records.

Mahajodi. A matrimonial app built with Flutter, Firebase and Stripe payments.
Other apps. Gaadi Bazaar (vehicle marketplace) and Sanduk (ed-tech platform), both Flutter front ends with animations and data caching; Remote Coach White Label (fitness app platform that produces many branded apps from one Flutter project).

Technical Skills

Languages: Dart, Python, JavaScript
Frameworks: Flutter, FastAPI, NextJS
State management and architecture: BLoC, Provider, Riverpod, GetX, GetIt, Clean Architecture
Databases: Firebase, Firestore, PostgreSQL, MongoDB, SQLite, Drift
APIs and integrations: REST, WebSockets, Postman, Swagger, Google Maps, eSewa, Khalti, Stripe
Practices and tools: Git and GitHub, CI/CD, offline sync, localization, push notifications, AI-assisted development (Claude, Codex, AGY)

Education

B.Sc. in Computer Science and Information Technology, Tribhuvan University (2016 to 2022)
+2 (HSEB), Sainik Awasiya Mahavidyalaya, Dharan (2013 to 2015), 73.3%
SLC (Grade 10), Little Flower English Boarding School, Dharan (2012), 75.25%
